## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-22, drawn to a method for inducing a CD8<sup>+</sup> cytotoxic T lymphocyte (CTL) immune response by using a heat shock protein or fragment of heat shock protein conjugated to a molecule, classified in class 435, subclass 7.1.
  - II. Claims 23-25, drawn to a method for inducing a CD4<sup>+</sup> dependent cytotoxic T lymphocyte response, classified in class 424, subclass 9.1
  - III. Claims 26-35, drawn to a composition comprising a heat shock protein, classified in class 530, subclass 350.

2. The inventions are distinct, each from the other because:

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions of Group I and II are directed to different immune responses. For example, the method of group I is for inducing a CD8<sup>+</sup> cytotoxic T lymphocyte (CTL) immune response, whereas the method of Group II is for a CD4<sup>+</sup> dependent cytotoxic T lymphocyte response.

Inventions I and III are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case, the inventions of the groups I and III are distinct because the product can be used in a diagnostic assay.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 1648

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
